TOOLS / PLATFORMS

DATABASES

Python, Linux, HTML

Git, Microsoft Excel

SQL

## PROJECTS / OPEN-SOURCE

DBSM STUDENT MANAGEMENT SYSTEM | [LINK](#)  
API, CSS

React.js, Node.js, PostgreSQL (Supabase), REST

Developed a full-stack student management system with role-based Admin and Student access.

Implemented student management, table allocation, student shuffling, food rotation, and Bible reading scheduling.

Built secure REST APIs with JWT authentication and integrated PostgreSQL for data management.

Deployed the application using Vercel and Render.
